

# Modern eSignature & Workflow APIs for Digital Health

Docubee embeds HIPAA-ready eSignatures, smart forms, and dynamic routing directly in your platform. Launch faster, protect PHI, and deliver the friction-free experience that today's providers, payers, and patients expect.

## Why Healthcare Product Teams Choose Docubee

### Challenge

### Docubee Advantage

#### Multi-channel Paperwork Chaos

Intake portals, PDFs, and paper packets live in silos.

#### Embedded, white-label workflows

unify data capture, signature, and storage within a single flow.

#### Per-Transaction Fees Crush Gross Margin

Usage spikes with seasonal enrollment and consent campaigns.

#### Unlimited, envelope-free pricing

locks costs and protects margin.

#### Regulatory Landmines

HIPAA and SOC 2 audits stall enterprise deals.

#### Tamper-proof audit trails, multi-factor authentication (MFA), and encryption

meet the most stringent security reviews.

#### Rigid Form Packets

Consent language and clinical questions change mid-study or mid-visit.

**Dynamic packet automation** enables teams to toggle sections or clauses on the fly —no restarts or resends required.

#### Competing Dev Priorities

Building and maintaining eSign infrastructure diverts devs from core roadmap items.

#### Modern REST APIs and webhooks

launch native eSign in a single sprint.

## High-Impact Use Cases

### Patient Intake & Registration

Auto-populate patient details from EHR or CRM integrations, capture eSignatures, and sync back structured data.

### NDA & Specialty Consents

Support templates, identity checks, and complete tamper-proof audit logs.

### Telehealth Treatment Plans

Seamlessly embed eSignature into telehealth workflows and automatically deliver signed plans to care teams.

### eConsent

Maintain version history, enforce sequential signature routing, and record immutable audit trails.

### Insurance Prior-Authorization

Auto-generate compliance-ready authorization packets and surface real-time status updates.

## Embed Frictionless eSignatures into Your Health Tech Platform

Seeing is believing. Book a live demo today at [Docubee.com](https://Docubee.com).
